

Absolute Location

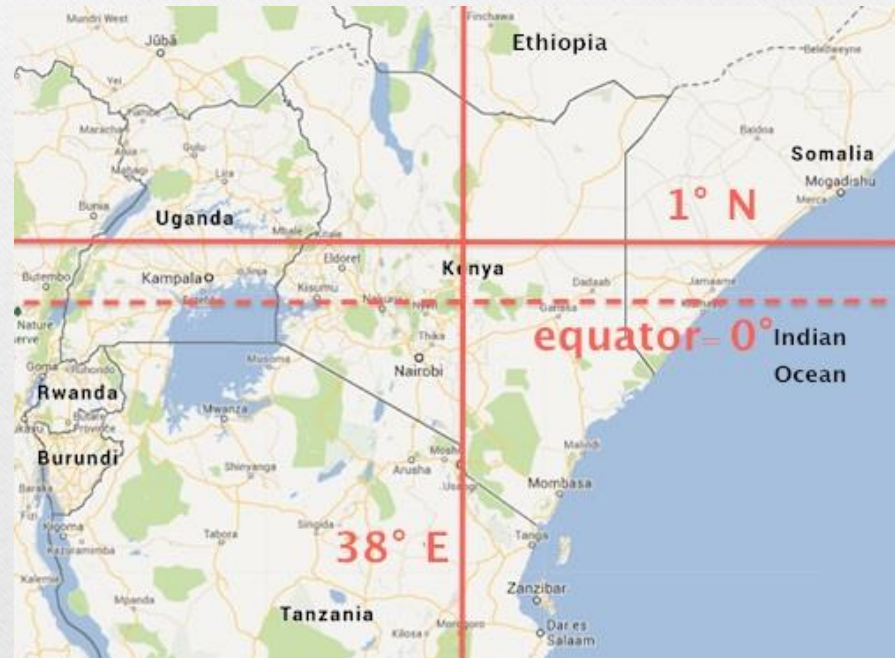

6.Ge.4

What is absolute location?

Absolute location: the location of a place using latitude (North/South) longitude (East West) coordinates.

Hint:

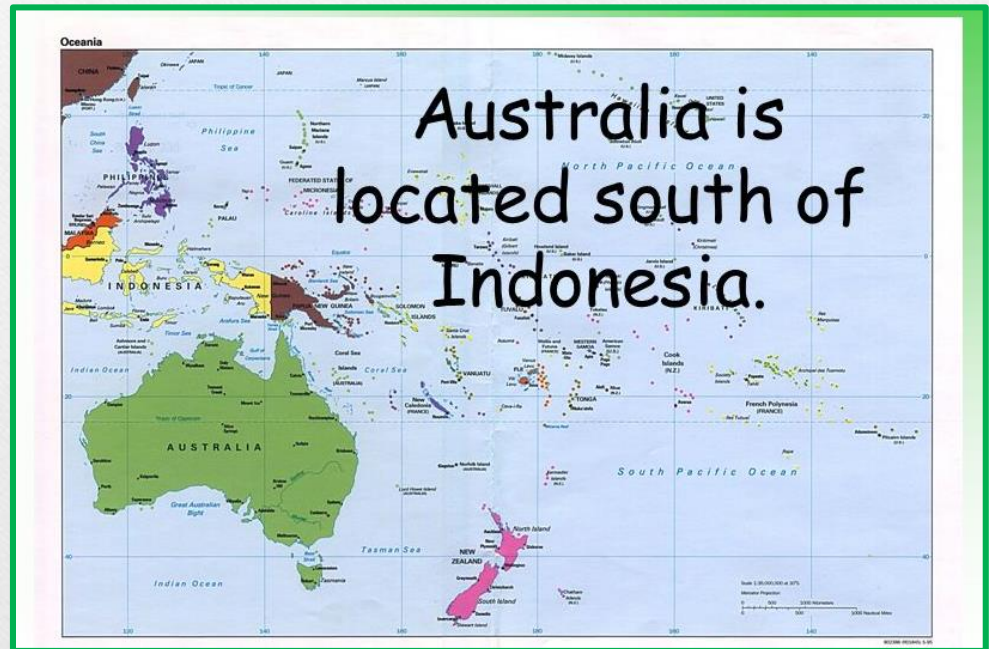

Whenever we write absolute location, we write North/South first

Relative Location

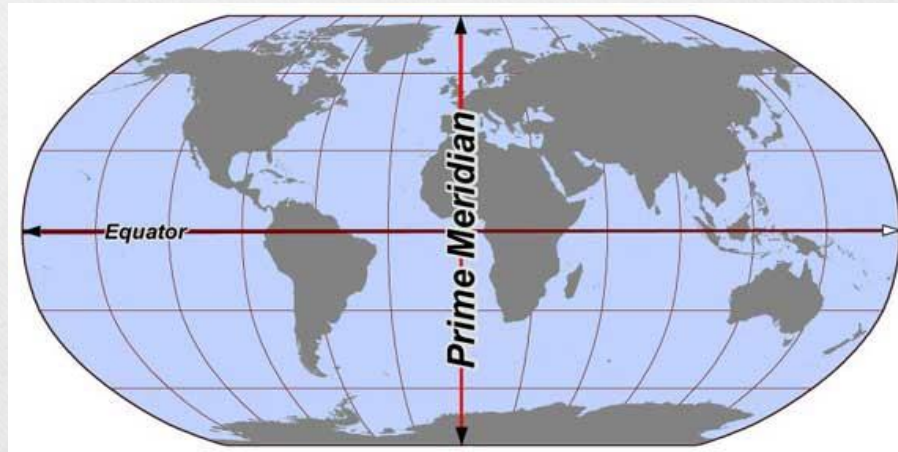

Relative Location: the location of a place in relation to another place

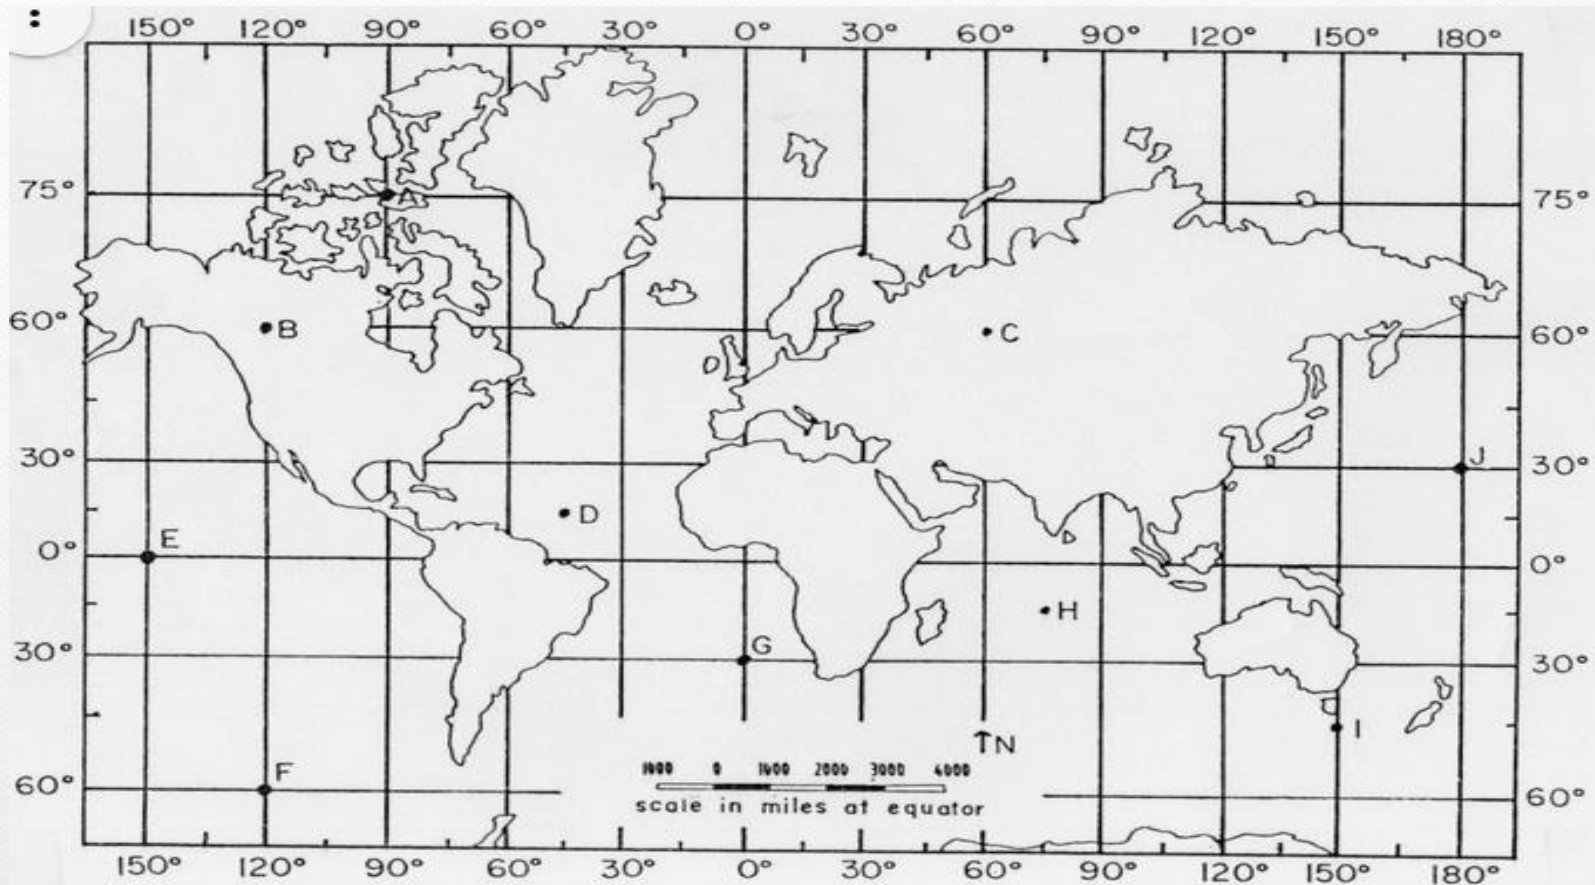

Example:
Columbus is 32 miles west of Newark
Australia is Southeast of Asia

Equator vs. Prime Meridian

- **Equator:** the line of latitude that separates the Northern and Southern Hemisphere
- **Prime Meridian:** the line of longitude that separates the Eastern and Western Hemisphere

A	75°N, 90°W
B	
C	
D	

E	
F	
G	
H	

Write each city's absolute location

Cairo	23°N, 25°E
Dallas	

Cape Town	
Rio De Janeiro
